NEUROINSIGHTS BY NEUROLOGY CARE

EXPERT'S CORNER

Established by Dr. Abu-Esheh and his team, Neurology Care embodies both excellence and compassion. Our unwavering commitment of over 15 years was fueled by the vision to create more than a mere clinic; we aspired to craft a sanctuary for neurological well-being. Entrust us with your care, experience the authentic compassion we offer, and join our cherished community as you embark on your journey with us.

PATIENT STORIES

"I saw Dr. Abu-Esheh a few years ago, he was thorough, kind and helpful. I stopped seeing him when I moved and found a new neuro, who was not nearly as good as Dr. Abu-Esheh. Moving back to Ardmore, I'm really happy to see him again. I feel like when I'm under his care, I know I'll get the best treatment available. The staff is great, very sweet people working there."

SETTING THE FOUNDATION FOR NEUROLOGICAL WELL-BEING

Embarking on a neurological journey is a unique experience, demanding both understanding and proactive measures. It's not merely about confronting challenges; it's about delving deep, comprehending them with clarity, compassion, and ensuring you're equipped with the right knowledge.

Did you know? An Electroencephalogram (EEG) is a non-invasive medical procedure that provides valuable insights into the electrical activity of the brain. It involves placing electrodes on the scalp to detect and record the electrical signals generated by brain cells, known as neurons. These electrodes are connected to a specialized machine that amplifies and displays the brain's electrical patterns as waveforms on a computer screen.
